INDEX TO ILLUSTRATIONS

Aërolites recently discovered in California 275
Albert Hopkins 468
Ambrose Swasey, 1846-1937, Plate VI ..... Op. 407
American Astronomical Society—
Hood College, Frederick, Maryland, December 28-30, 1936, Plate I...Op. 59
Williams College, Williamstown, Massachusetts, September 8-11, 1937, Plate VII ..... Op. 523
Asteroid, Amphitrite, Path of, in summer of 1937 376
Pallas, Path of, in summer of 1937 321
Burrell, E. P., 1871-1937 479
Circles on celestial sphere 142
Comet Finsler 381, 439
Diagram of orbit and path of 380
1937 *b* (Whipple) 158
Diagram of orbit of 224
1937 *c* (Wilk-Peltier) 222
Diagram of orbit of 223
Constellations in square degrees, Area of 131
Corona photographs, June 19, 1936 236
"Crater," The Tiffin (Iowa) 446
Eclipse, Annular, of December 2-3, 1937 30
camp at Okoppe, Hokkaido, June 19, 1936 234
of 1937, May 25, The penumbral lunar, Plate V ..... Op. 349
station at Huanchaco, Peru, June 8, 1937 354
Total, of June 8, 1937 29
phase of, June 8, 1937 355
Eclipses, Limits of umbral lunar (diagram) 548
Penumbral and umbral limits of solar and lunar (diagram) 541
Giuntini's diagram of the Copernican system 71
Hayden, Charles, 1870-1937 117
Jupiter, Diagram of orbits of satellites of, in 1937 33
Lunar appulse diagrams 126, 127
craters, Typical 67
hour angles and clock rates, Diagrams relating to 139, 140
mountain Pico, Drawings of the, Plate IV ..... Op. 291
and Pico B, Drawings of 291
Mars, Drawings of in 1924 and in 1937 431
Mercury, Path of, at time of partial transit 31
Meteor heights, Charts relating to 270, 271, 272
spectrograph with four prism-cameras, A rotating 215
spectrum photographed with rotating spectrograph, A 216
Meteorite, Photograph showing structure of Xiquipilco, Mexico 276
The Norfork, Arkansas 564

Meteoritic iron, Microphotograph of a probably free copper particle in..... 105
sulphide, Graph showing percentages of iron and sulphur... 387
Nebula in Orion and in Andromeda, Plate II .....Op. 175
N.G.C. 4565 4
Nebulae, Distribution of the 4
Norfork, Arkansas, meteorite, The 564
Observatory built by Mr. Yalden in Leonia, N. J. 298
of Mr. Warner and Mr. Swasey at Cleveland, Ohio 410
The Hopkins 474
Pickering, Professor W. H., and his 12.5-inch Calver reflector 365
Planets, Chart showing visibility of, in 1937 26
Polar star trails in 1925 and in 1935 8
Sand crater, Typical, made under water 65
craters, Laboratory apparatus for making 64
Saturn, Diagram of orbits of satellites of, in 1937 34
Solar and lunar saros series (diagram) 541
globe, Photograph of 343
Spectra of sun and corresponding eclipse phases, June 19, 1936, Plate III..Op. 233
Spectrograph mounting 24
Star density compared with galactic polar distance 134
trails, North polar, in 1925 and in 1935 8
Sunspots photographed February 22, 1937 254
Swasey, Ambrose, 1846-1937, Plate VI .....Op. 407
and the dividing engine which he considered his greatest achievement 414
MacDonald telescope mounting 413
W. R. Warner and their first telescope 411
Mr. Brashear, and the Peking instruments 418
observing the eclipse of the sun, August 31, 1932 416
Telescope, Lunar, with 135-foot focus at "Woodlawn," Mandeville, Jamaica. 371
mounting 24
Views of reflecting, at Mandeville, Jamaica 372
Tycho Brahe's island 122
Uraniburg on the island of Hveen 121
Variable star γ Cassiopeiae, Light variations of, October, 1936, to November, 1937 569
Nova Aquilae (1936), Light curve of 219
RR Tauri, Light curve of, 1928-1936 152
RY Sagittarii, Light curve, in 1932-1937 278
SS Cygni, Peculiar variations of, in 1936 38
U Cygni, Light curve 458
χ Cygni, Observed maximum magnitudes 1842-1937 390
stars, Map of fields of 88
Statistical diagrams relating to 86
Warner, W. R., and Ambrose Swasey and their first telescope 411

GENERAL INDEX

Aërolites, Some new California, *H. H. Nininger* and *C. H. Cleminshaw*..... 273
Agglutination and gravitation, *William E. Glanville* 171
Aitken, Robert Grant, Driving back the dark 241
Alpha Cassiopeiae, The light variations of, *Noah W. McLeod* 96
Amateur Astronomers Association 226
Pittsburgh, Pennsylvania 110, 172
Astronomical Society of Los Angeles, The 392, 461
New Haven, 171, 225, 281, 341, 393, 394, 513, 572
Amateurs, Notes from 52, 110, 171, 225, 281, 337, 392, 460, 512, 572
Ambrose, Swasey, *J. J. Nassau* 407
Philip Fox 352
American Association for the Advancement of Science, Meeting of Section D (Astronomy), *E. A. Fath* 62
N. W. Storer 360
of Variable Star Observers, Variable star notes from the, *Leon Campbell* .....
.....37, 92, 151, 219, 278, 333, 389, 457, 508, 569
Astronomical Society meeting 402
The fifty-seventh meeting of the, *Dean B. McLaughlin* 59
fifty-eighth meeting of the, *Curvin H. Gingrich* 432
Appulses, On the visibility of lunar, *Alexander Pogo* 126
Aquarius (poem), *Frances Morton O'Neill* 189
Asteroid names 229
notes, *Hugh S. Rice* 112, 148, 261, 320, 376, 463, 493, 550
numbers, early and modern 462
Astrological fallacies, *Richard P. Lochner* 574
Astronomers during the second and first centuries B.C., Greek, *A. Willard Turner* 81
Some forgotten 173
to visit the United States, German 575
Astronomical book, Inquiry about an ancient 229
Society Bulletin, The New Zealand 228
of France, The 228
The Cleveland 110, 226, 342, 514, 572
Rittenhouse 54, 114, 172, 287, 346
Astronomy, Amateur 1
at Harvard, Summer conferences on 114
the Paris exposition 462
in Japan, Fragmentary notes on, *Yasuaki Iba* 301
News, Junior 228
The revival of popular interest in, *H. B. Rumrill* 310
'37 down the centuries in 347

Astrophysical monographs 114
Aurora Borealis and sunspots 573
observed 460
Auroral display, An 403
unusual, *N. T. Bobrovnikoff* 299
observed at the McDonald Observatory, *C. T. Elvey* 517
Australites: are they glass meteorites?, *Charles Fenner* 504
Bacteria in stony meteorites, Additional notes on the question of living, *Sharat K. Roy* 499
Belot, Emile, The true law of distances of planets and satellites 115
Bennett, Dorothy A., The Hayden Planetarium-Grace eclipse expedition..... 353
Bobrovnikoff, N. T., An unusual auroral display 299
Book Reviews—
A Manual of the Principles of Meteorology, by R. Mountford Deeley.... 403
Amateur Telescope Making—Advanced 403
Am Fernrohr, by Dr. Friedrich Becker 463
Astrographic Catalogue, 1900.0 288
Astronomie, by Oswald Thomas 289
Bibliography of Early American Textbooks on Algebra, by Lao G. Simons 288
Celestial Globe, Rand McNally and Co. 520
Cosmic Rays, by P. M. S. Blackett 56
Cosmogonies of our Fathers, by Katherine B. Collier 55
Contributions from the McDonald Observatory 406
Galaktischer Atlas, by K. F. Bottlinger and Irmgard Beck 521
Games and Stunts for all Occasions 57
Indian Mathematical Society 290
Interpolation and Allied Tables 57
Katalog und Ephemeriden Veränderlicher Sterne fur 1937, by H. Schneller 56
Kleine Meteoritenkunde, by Fritz Heide 404
Kleine Planeten fur 1937 56
Lange's Handbook of Chemistry 576
Le Faisceau Energétique Terrestre, by Dr. G. Froin 521
Lick Observatory Bulletin 406
Magnetic Declination in the United States, by Daniel L. Hazard and W. N. McFarland 348
Man in a Chemical World, by A. Cressy Morrison 519
Named Lunar Formations, by Mary A. Blagg and K. Müller 579
Norton's Star Atlas 404
Photography of the Planets, by H. J. Gramatzki 577
Publications of the David Dunlap Observatory 405
Publications of the Observatory of Michigan 405
Publications received 57, 290, 405
Star maps from Duncan's Astronomy 56
Southern Stars 57
The Distribution of Stars in Space, by Bart J. Bok 520
The Romance of the Calendar, by P. W. Wilson 577
The Structure of the Milky Way, by Torsten R. Hedengren 289
Transactions of the International Astronomical Union 289
Unveiling the Universe, by Norton Wagner 578
Brady, L. F., Some remarks on the physical problems involved in the crystallization of iron in a graphitic matrix in meteoritic material 165

Brocchi, D. F., Constellations 130
Negative characteristics 281
Brockmeyer, Charles H., Jr., How to find Venus at midday without setting circles 52
Browne, William Malcolm, Visibility of the planets for 1937 25
Buddhue, John Davis, A probable occurrence of free copper in a meteorite.. 103
Doubtful meteorites 106
Fused meteoritic iron 275
The composition of meteoritic iron sulphide 386
meteors 166
Bunyan, John, Quick method for conversion of standard time into sidereal time 512
Burrell, E. P., *J. S. Plaskett* 478
Campbell, Leon, Variable star notes from the American Association of Variable Star Observers *37*, 92, 151, 219, *278*, 333, 389, 457, 508, 569
Celestial mechanics, The simpler aspects of (Fifth paper), *Homer A. Harvey* 141
Christie, William H., Note on the coming eclipse of Zeta Aurigae 154
Cilley, Morgan, Drive for a small dome 129
Cinematographic observations of the total solar eclipse of June 16, 1936, *S. Goto* and *M. Yamasaki* 233
Classification of solar and lunar eclipses, *Alexander Pogo* 540
Cleminshaw, C. H., and *H. H. Nininger*, Some new California aërolites..... 273
Comet 1925 II (Schwassmann-Wachmann) 41, 91, 158, 225, 323, 382
1927 VI (Gale) 41, 440, 496, 568
1935 *d* (Van Biesbroeck) 40, 91, 440, 496, 568
1937 *a* (Daniel) 156, 224
1937 *b* (Whipple) 157, 224, 264, 381, 439, 496, 568
1937 *c* (Wilk-Peltier) 222, 265, 323
1937 *f* (Finsler) 379, 439
Some observations of 440
1937 *g* (Hubble) 437, 496, 568
d'Arrest 41
Encke 41, 382, 438, 495, 567
Grigg-Skjellerup 41, 158, 225, 265, 322, 381
Neujmin 568
New 264
Tuttle-Giacobini 41, 158
notes, *G. Van Biesbroeck* 40, 91, 156, 222, 264, 322, 379, 437, 495, 567
Comets, A note on the origin of, *G. K. Daghlian* 399
Communications and comments 51, 170, 284, 396, 574
Constellations, *D. F. Brocchi* 130
Copernican hypothesis, Francesco Giuntini and the, *Grant McColley* 70
Correction 462
Cosmology and Newton's theory, *David Fleming* 400
Crilley, Raymond E., Collecting data on meteors and fireballs 190
Daghlian, G. K., A note on the origin of comets 399
Date of the 2000th anniversary of the birth of Augustus, The 348
Displacement of the meridian as a function of the lunar hour angle, On an apparent, *Maynard F. Jordan* 138
Distances of planets and satellites, The true law of, *Emile Belot* 115
Distribution of the spirals, Recent results on the, *Paul D. Jose* 2
Documentation Institute, American 346

Dome, Drive for a small, *Morgan Cilley* 129
Driving back the dark, *Robert Grant Aitken* 241
Earthquake observed at Washington, Alaskan, *F. P. Scott* and *Lloyd R. Wylie* 429
Eclipse expedition to Peru, The Brown University, *Charles H. Smiley* 475
The Hayden Planetarium-Grace, *Dorothy A. Bennett* 353
Observations near the noon point of the 1937 358
of June 19, 1936, Cinematograhic observations of the total solar, *S. Goto* and *M. Yamasaki* 233
June 8, 1937, Expedition to observe the 252
The total solar, *Charles H. Smiley* 238
the moon, November 18, 1937, Partial, *H. B. Rumrill* 576
sun, July 29, 1878, A total, *James H. Freeman* 491
Eclipses, Classification of solar and lunar, *Alexander Pogo* 540
Elements and constants, The T-term in formulas of, *Hans A. Eriksen*..... 514
